

JAKE NAPAY

09766281920 | napayjakem@gmail.com | <https://www.linkedin.com/in/jake-napay-ab6a96257/> | <https://jakenapay.vercel.app/>
Passionate developer with strong skills in software developing and engineering, AI/ML engineering, experienced in building scalable systems and data-driven solutions. Focused on clean code, problem-solving, and delivering applications that improve efficiency and user experience.

Work Experiences

Divine Software Systems, LLC – Fremont, CA, USA (Remote)

Software Engineer

April 2026 – May 2026

- Conducted Quality Assurance (QA) for multiple mobile applications, including functional, regression, and usability testing.
- Collaborated with the development team to resolve issues and ensure applications met client requirements and were delivered production-ready.
- Developed and tested three cross-platform mobile applications for iOS and Android.

Concerted Management Corporation (Motortrade) – Mandaluyong, Philippines

System Analyst

Jan 2026 – April 2026

- Designed and implemented a new RESTful API for OTP authentication to resolve critical production failures.
- Engineered a custom visitor tracking system to securely capture user session data, page navigation, and metrics across the company website.
- Deployed new internal modules and provided technical error resolution for enterprise systems supporting 900+ branches nationwide.

NTEK Systems Inc. - Quezon City, Philippines

Full Stack Web Developer

Oct 2024 – Dec 2025

- Designed, developed, refactored, and deployed multiple web applications for various state universities.
- Architected an end-to-end backend and RESTful APIs using CodeIgniter 4 and JavaScript to power dynamic, persona-driven AI companions for a mobile game, using OpenRouter, OpenAI GPT, and Grok LLMs via advanced prompt engineering and fine-tuning under strict version control (e.g., Git).
- Refactored and deployed a web application, submitted its features to the BIR, and achieved accreditation.
- Experienced in multiple programming languages, Python AI/ML, LAMP/MERN stacks, AWS EC2, and managed *Ubuntu & Windows* servers.

Eulogio “Amang” Rodriguez Institute of Science and Technology, MIS Office - Manila City, Philippines

Technical Support Staff Intern

Apr 2024 - Jul 2024

- Built entire end-to-end from scratch using PHP, MySQL, JavaScript that monitors computer laboratories
- Delivered technical support to 50+ faculty members and offices, resolving network, hardware, and software issues

Projects

Doc AI (Document Analyzer)

AI Engineer, Full Stack Developer

Apr 2026 – May 2026

- Engineered a scalable Python backend using FastAPI and Uvicorn to parse and process complex documents (PDF, DOCX, XLSX).
- Integrated the OpenRouter API to construct a generative AI pipeline capable of instantly generating flashcards, summaries, and Q&A pairs from user uploads.
- Designed a secure, responsive frontend featuring Chart.js analytics, implementing slowapi rate-limiting and TTL caching for optimized API performance.

Thesis Repository

Full Stack Developer

Jun 2025 - Sep 2025

- Engineered an end-to-end web platform for the centralized management and retrieval of academic and technical documents for a university.
- Developed the system primarily in CodeIgniter 4 with supporting assets in Bootstrap and other languages such as JavaScript.
- Supported end-to-end deployment and delivered the project successfully to client with no anomalies.

Education Level

Eulogio “Amang” Rodriguez Institute of Science and Technology - Manila, Philippines

Bachelor of Information Technology

Sep 2020 - Sep 2024

- DICT TechXcelerate — Certificate of Participation, DICT Region IVA – Rizal (2023)
- Research Colloquium — Certificate of Participation, EARIST Manila, College of Computing Studies (2024)
- Developed an Inventory Management System for DevCon Kids, supporting multi-branch operations and delivering data-driven insights.
- Storage Supply Management System with Data Analytics – Developer, Registrar’s Office

Skills, Achievements & Other Experience

<u>TESDA NCII: Computer System Servicing</u> (2023) <u>FreeCodeCamp: Responsive Web Design</u> (2023) <u>Alisson: Python for Beginners</u> (2023) <u>Alisson: Introduction to Artificial</u>	<u>Intelligence (AI)</u> (2023) - Python (Core & Libraries), JavaScript, TypeScript, Node.js, Express.js, FastAPI, CodeIgniter 4, HTML5/CSS3 - AI & Data Engineering: LLM Deployment, Prompt Engineering, Fine-	- Tuning, Deep Learning Architectures, Neural Networks, Event-Driven Programming, API/Schema Design - Git/GitHub, Cloud AI Integration (AWS EC2), Ubuntu & Windows Server Administration
