Hiring Manager

Commonwealth Medical

recruitment@commonwealthmed.com.ph

Dear Hiring Manager,

I am writing to express my strong interest in the Software Developer position at Commonwealth Medical. With a Bachelor's degree in Information Technology, over a year of professional experience in full stack web and software development, and a proven track record of delivering production-ready systems, I am confident that I am well-equipped to contribute meaningfully to your IT team from day one.

Throughout my career, I have worked across multiple industries and roles — from Full Stack Web Developer at NTEK Systems Inc., where I designed and deployed enterprise-level web applications for state universities, to System Analyst at Concerted Management Corporation, where I engineered a RESTful API for OTP authentication and built a custom visitor tracking system deployed across 900+ branches nationwide. Most recently, as a Software Engineer at Divine Software Systems, LLC (USA, Remote), I developed and QA-tested three cross-platform mobile applications, collaborating closely with an international development team to deliver production-ready solutions.

I bring proficiency across multiple programming languages and frameworks including JavaScript, TypeScript, Python, PHP, Node.js, Express.js, FastAPI, and CodeIgniter 4. While my primary stack is web-focused, I have a strong foundation in software engineering principles — including object-oriented programming — that allows me to adapt to technologies such as C# with confidence and speed.

Beyond technical skills, I am highly capable of working independently, managing multiple priorities simultaneously, and approaching projects from both a client and business perspective. I have worked directly with stakeholders, collaborated with development managers, and delivered systems end-to-end with no anomalies — reflecting my commitment to quality, reliability, and clear communication.

I am excited about the opportunity to bring my skills, adaptability, and passion for software development to Commonwealth Medical. I have attached my resume for your review and would welcome the chance to discuss how I can add value to your organization.

Thank you for your time and consideration. I look forward to hearing from you.

Respectfully,

Jake Napay
